

## Internet Pet Feeder Unveiled

An automatic Internet-enabled pet feeder will go on sale next month for 500,000 won.

Named "PetWatch," by a previously little-known venture company 3B System, the machine allows customers to feed and watch their pets in real time over the Internet.

The company said it is the first product in the world, and it is aimed at changing Korea's image as a country of pet lovers.

"Pets are no longer animals we simply raise.. They are a loving part of the family and one of the main things that people need nowadays," said President Choi Baek-young.

Orders will be accepted over the Internet at , or by phone or selected outlets.
